

DSP7043 4.5" 2-Way Wall Mount Speaker

Features

- Compact and classic full-range, all-purpose wall mount speaker, exceptional reproduction of music and speech for indoor commercial background and foreground applications;
- 2-way system, with integrated passive crossover network and tweeter overload protection;
- 4.5" high output woofer and 1" voice coil compression driver with 130° horn, brilliant audio with wide controlled coverage pattern for vertical or horizontal mounting
- 30 Watt RMS running to 60 Watt maximum, efficient high power output for clear and powerful sound;
- Simple and flexible installation, U bracket and M6 screw knob with integrated Recessed carry handles.

Description

The full-range speakers are designed for professional music and speech reproduction in an impressive array of background and foreground audio applications. The classic and robust design suits a variety of commercial interiors. Ideal for single-source audio in smaller venues, or straightforward integration into multi arrays.
