

Window Intercom System

NF-2

Make your voice be clearly heard
through the window

Still Speaking Loud through the Window?

Compact & Lightweight

The intercom station can be installed in small spaces where big or heavy objects are hard to locate and mount.

Instant Installation

Simple wiring and mounting process is even suitable for temporarily booth setup and/or relocations.

A magnet is pre-mounted on the backside of the station for tool-free quick installation back to back. The optional magnetic plates with a double-sided tape are also included for more flexible installations.

My voice

can be clearly heard

Sophisticated Audio Control

Boosting higher frequencies which are necessary to maintain intelligibility but mostly lost by partitions. The higher frequency sound helps not to spread widely.

Higher frequencies are remarkably decreased by mask and partition
