

ZMX862

6-Channel Compact Mixer

Professional-Grade Mixing With a Small Footprint

The ZMX862 is a 6-channel, 2-bus mixer with the right amount of inputs, outputs, routing, and EQ for more intimate live performance reinforcement situations. Features two microphone inputs, each with with Phantom Power, the ZMX862 also has a three-band EQ, two aux sends per-channel for external effects and monitoring, and even two track inputs for things such as audio playback. The ZMX862 is a perfect, take-anywhere professional mixer.

Versatile Inputs and Outputs

The ZMX862 is a step up from our massively popular ZMX52 that adds more inputs and an extra band of EQ as well as a switch for phantom power. Not only can you plug dynamic, condenser, and wireless microphones into the first two channels, you also get two stereo channel inputs for keyboards, drum machines, and other instruments. Plus, you can easily plug in your MP3 player, CD player, or audio from a DVD player into the CD/TAPE inputs. But, you also have two AUX sends that you can use to send streams of audio from your mixer to a digital effects unit, stage monitor, or any number of destinations. Choose the ZMX862 as the audio central command for your live performances, home studio, or video suite and be ready for any audio curveball.
